PROPOSAL FOR CONDUCTING CRE PROGRAMME

1. Topic: Curricular adaptations

2. Duration: 5 days – 12th to 16th November, 2018

3. Background and Justification:

Hearing impairment creates barriers in the language development process. Children with hearing impairment may have deficit language and therefore may develop problems in education.

The objectives of curriculum may need to be set accordingly. It is important that a special teacher should realize that children with hearing impairment have to be taught differently. They may need special attention specialized methods and techniques of teaching as well as adaptation of curriculum to cater to their specific needs. Due to the problems in language of children with hearing impairment the aim of special school is primarily developing knowledge.

Taking into consideration the special needs of the children with hearing impairment certain adaptation in the curriculum are done in the syllabus, methods and techniques of teaching, co curricular activities, evaluation procedure and teaching learning material. The adaptation may be required at all levels that is at pre-school, primary to secondary depending upon the language levels of children with hearing impairment.

4. Objectives of the programme:

1. To develop the knowledge on adaptation of curriculum and curriculum transactions various levels among the teachers in schools for children with hearing impairment and inclusive schools.
2. To upgrade the knowledge about the importance of text books and their adaptations for children with hearing impairment among the teachers in schools for children with hearing impairment and inclusive schools.
