Message from the **VICE-CHANCELLOR**

The global employment industry today has revamped from what it was a decade ago. Organizations are not only searching for people with a prescribed skill set, but more importantly, people with the potential to broaden this requisite skill set during their work. Through their meritorious contributions, our ingenious alumni have set new standards in the corporate world and it is my firm belief that we will continue that legacy in the years to come.

- Prof. D. Jamuna

Message from the **REGISTRAR**

The placement and career counseling cell operates successfully in providing SPMVV students with multiple job-oriented training and imparting company specific skills and providing students with placement opportunities. The cell constantly pitches different industries to build partnerships and network with industry people for placements.

- Prof. D.M. Mamatha

Message from the **PLACEMENT OFFICER**

Starting from the first year, The Placement Cell organizes career guidance programs and training programs such as Mock Interviews, Group Meetings, Communication Skills, Technical Trainings, Workshop, etc., for all students. It also allows HR executives from various industries to conduct training.

The maximum salary package has exceeded notably, from 3.36LPA to 7LPA. We would like to thank all the stakeholders involved in the placement process, as this process would not have been completed successfully without their unconditional support and assistance. We would also like to express our appreciation to our fellow faculty members, students and distinguished alumni who have assisted and facilitated the smooth conduct of the placement process.

PLACEMENT & CAREER COUNSELLING CELL

The main aim of every University Placement Cell is to close the gap between the industry's tough competition and the college's talent pool. Students will develop their talents and learn how to better showcase their strengths with the right preparation and encouragement. Not only does the Placement Cell provide students with training programmes to help them acquire a range of essential skills.

The Placement Cell not only provides students with training programmes to help them improve different essential skills, but it also makes the recruiting process simpler for all qualified students.
